

the company

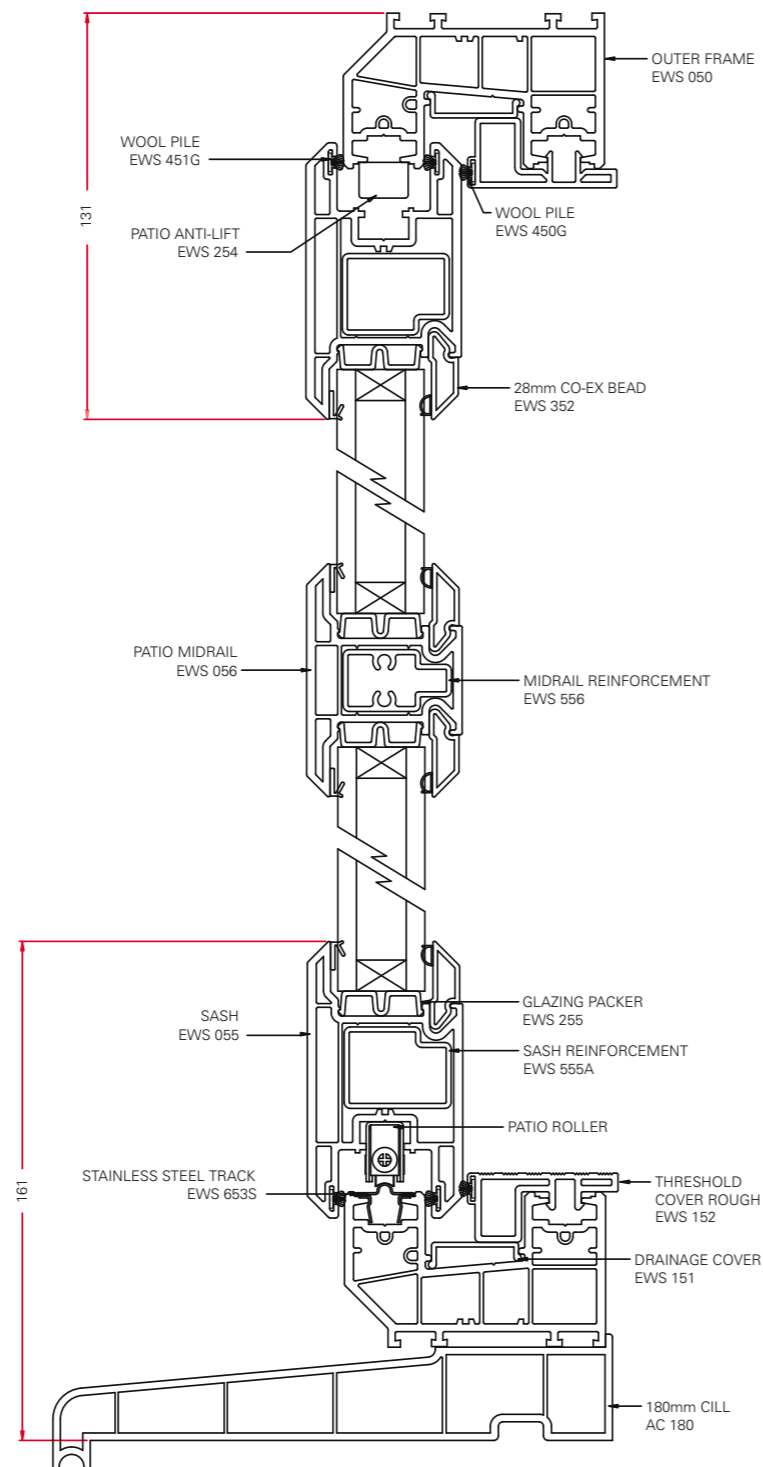

Eurocell Profiles Ltd is one of the leading suppliers of PVC-u window, door, conservatory and roofline systems in the UK. Supplying a wide range of fabricators across the country, including some of the biggest fabrication companies in the market. Eurocell is committed to providing first class service and product to all its customers.

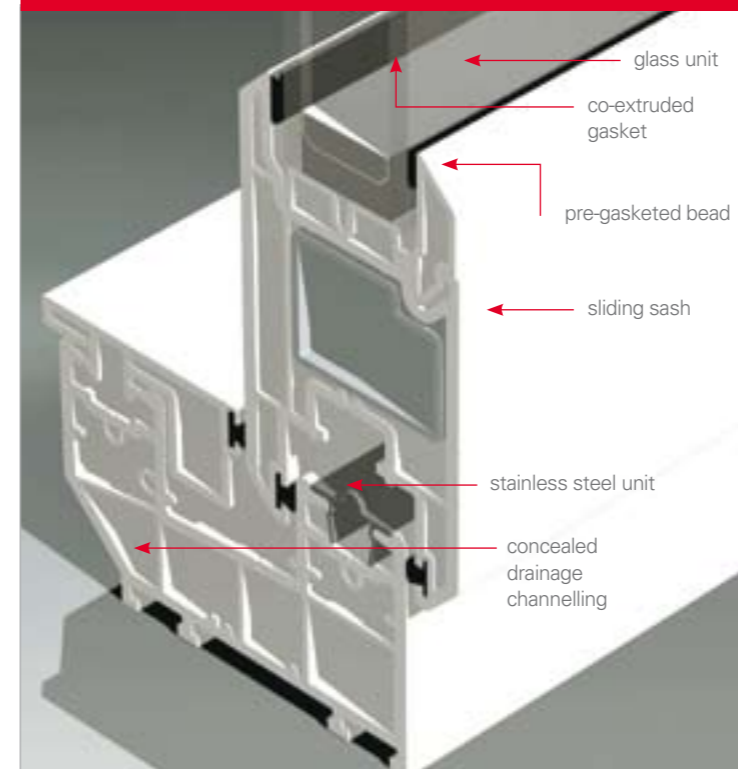

tested to BS 6375

what is the inline system?

The Eurocell Inline Patio system has been designed to meet the requirements for a variety of commercial and domestic settings. The mainframe reduces from 84mm to 70mm and can therefore be used with all Eurocell 70mm window profiles.

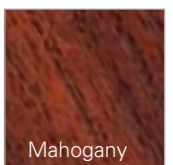

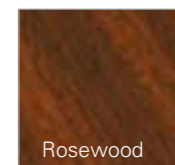

euroslide cross section

key benefits

- Slim, attractive system
- Available in bar lengths and kits
- All Eurocell window and door profiles are made from high quality virgin material
- Main frame reduces from 84mm (front to back) to 70mm and can therefore be 'buted up' against other Eurocell standard profiles
- Design of the sash profile incorporates a full Eurogroove that allows the patio door to accept most hardware, including two or four point locking systems - shootbolts, mushroom espagnolette or hook locks for improved security
- Separate chambers for improved drainage, thermal efficiency and strength
- Internally glazed for improved security
- Fusion welded joints
- Ventilation can be fitted
- 28mm glazed units for continuity of ordering
- Patented knock-in 45° putty-line bead and ovolo option
- Pre-gasketed sash reduces stock and fabrication time
- Robust steel and aluminium reinforcing sections
- Clip in glazing packer
- High durability gold finish handles
- Available in white, golden oak, mahogany and rosewood
